# YOUR MULTI POSITIONING DEVICE

The Baffin Trio is here to revolutionise sitting and standing for teenagers and adults by combining the two functions into the one product.

Get the benefits of both a seating system and a standing frame in the once peice of equipment. This is not only cost effective, only needing the one product, but its a space saver.

STANDING

LYING

SEATING

The Baffin Trio consists of a seat, back support with the 2nd spine, side supports, footrests, head support, knee pads, hip belts, a vest, an activity table, and the moveable base.

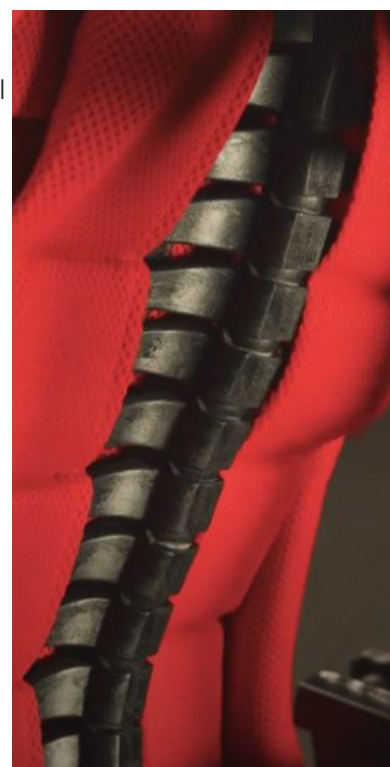

## SECOND SPINE

The Baffin features a built in spine system which can move and twist to mimic an actual spine. This means that the baffin can be adjusted and custom moulded to fit the users body shape perfectly.

With the built-in spine, side supports and pelvis correction, Baffin Trio is a perfect device for seating, standing, and lying. Spinal support along the whole back helps to reduce pressure, and establish a correct sitting position.

## KEY FEATURES

- Large height adjustment range from 135cm to 180cm
